Profile

Motivated Cybersecurity Master's student at HDBW Munich with hands-on experience in SIEM, incident response, and system hardening. Former Programmer Analyst at Cognizant with a strong foundation in software testing and secure development. Passionate about protecting digital infrastructure through proactive threat detection and mitigation.

Experience

- 07/2024 – 01/2025 **Programmer Analyst Trainee**, *Cognizant Technology Solutions India Pvt. Ltd.*, Chennai, India.
- Role and Responsibilities:
 - Conducted manual and automated testing using Cypress and JIRA, improving defect detection efficiency by 25%.
 - Supported secure coding practices and quality assurance for enterprise web applications.
 - Delivered internal training on automation and test workflow optimization.
 - Tool - Agile development, Tosca, QTest, Git-Lab, Microsoft Office.
- 12/2023 – 06/2024 **Programmer Analyst Trainee - Intern**, *Cognizant Technology Solutions India Pvt. Ltd.*, Chennai, India.
- Role and Responsibilities:
 - Led a full-stack development project as part of an SDET internship, guiding the team for seamless execution while building a real-time retail management application using Java.
 - Gained hands-on experience in functional testing and automation frameworks like TestNG, Selenium, and Cucumber, and automated a real-time web application while performing regression and smoke testing.
 - Tool - Core Java, Spring Boot, MySQL, Selenium
- 10/2023 – 11/2023 **Software Developer Intern**, *Digitus Business Solutions Pvt Ltd*, Bangalore, India.
- Role and Responsibilities:
 - Developed a secure and responsive front-end using Vue and Vuetify, implementing JWT-based authentication with Spring Security and optimizing user and purchase-order workflows for efficient system performance.
 - Tool - Vue.js, Vuetify, Java Core, Spring, and Spring Boot, Postman, Eclipse, Git

Education

- 03/2025–09/2026 **Master of Science (MSc) Cyber Security**
Hochschule der Bayerischen Wirtschaft gGmbH (HDBW), Munich, Germany. (Ongoing, Current Grade: 1.79 / 5.0)
- AI Methods:** ML-Based Cyberattack Detection & Classification (Individual Project)
 - Engineered and optimized features from network traffic data and applied ML models (Random Forest, MLP) in Python to detect and classify cyberattacks with **92% accuracy**, documenting workflows and visualizing insights for effective result communication.
 - Project Link:** Classifying-CyberAttacks-Using-ML
 - Computer Systems and Networks:** Computer Networks Simulation Using **GNS3** (Coursework Project)
 - Designed and simulated a secure hierarchical network (10–20 devices) using **OSPF, VLANs, HSRP, and port security** with cloud connectivity via Bridge/NAT, analyzing traffic in **Wireshark** for optimization and troubleshooting.
 - System Analysis and Hardening:** Audited and hardened Linux and Windows systems by **analyzing logs** (journalctl, auditd), **securing authentication** (PAM), mitigating vulnerabilities (**buffer overflow, SSH/RDP hardening**), managing users, and enforcing **DAC, MAC, RBAC and ACL policies**.
 - Application Development and Security Lifecycle:** Hands-on experience in analyzing **OWASP Top 10** vulnerabilities using **Burp Suite**, evaluating **CVEs with CVSS**, understanding **CWEs**, applying STRIDE threat modeling, practicing secure coding/deployment, and implementing core **security principles** (CIA, least privilege, defense in depth).
 - Cryptography:** Gained hands-on and theoretical knowledge in Cryptography, implementing **symmetric/asymmetric encryption, hashing, digital signatures, PKI, SSL/TLS**, key management, and secure communication principles.

06/2019– **Bachelor of Engineering (B.Eng.) Computer Science**
04/2023 Anna University, Chennai, India. (Graduate - CGPA: 8.38 / 10.0)

- **Bachelor Thesis:** AI-Enhanced Eye Tracking System for Tetraplegia Patients (Group Project)
 - Developed and led a deep learning-based eye-gaze communication system for tetraplegic patients using **CNNs** and real-time gaze tracking, enabling message transmission via Twilio through optimized dataset collection and model tuning.
- **Paper Publication:**
 1. *AI Enhanced Eye Tracking System For Tetraplegia Patients*
- **Mini Project:** NALA: The Virtual Voice Assistant using Python
 - Developed a Python-based voice-controlled system using SpeechRecognition, pyttsx3, webbrowser, and pyautogui to execute tasks through intuitive voice commands.
 - Github link : NALA-The-Virtual-Voice-Assistant
- **IBM Project:** Vehicle Performance Analyzer using Machine Learning
 - Developed a vehicle performance analyzer on IBM Cloud using front-end tech and ML (Random Forest Regressor) to predict vehicle mileage.
 - Github link : Vehicle Performance Analyzer

Personal Cybersecurity Projects And Labs

GitHub /Arshathhaq

Blog Arshathhaq97

- 10/2025 **Active Directory Security & Privilege Escalation Training** - Built a secure AD test environment to simulate authentication flaws and privilege escalation scenarios for cybersecurity training. (PEH Cert)
- 09/2025 **SIEM & Incident Response Lab** — Built on Wazuh (monitoring) + TheHive (case management); monitored simulated attacks and generated actionable alerts. - More: Medium Blog
- **Tools & Skills:** Wazuh · TheHive · Docker · SIEM · Security Monitoring · Incident Response · Threat Simulation
- 05/2025 **Active Directory Home Lab** — Deployed an on-prem Active Directory lab with domain controllers, users/groups, and GPOs for hands-on identity and access management practice. (Practical Help Desk Certification - TCM)
- 07/2024 **Vulnerable Machines / Pentest Lab** — Created a pentesting lab with Metasploitable and EternalBlue scenarios for exploit development, vulnerability validation and post-exploitation practice.

Participations Active in MetaCTF and TryHackMe (HMA.1002), Gaining hands-on expertise in cryptography, OSINT, and Cyber Kill Chain techniques.

Certifications

Certifications **GitHub:** Arshathhaq/Certificates

- ISC2 Certified Cybersecurity (CC) 2025 - ISC2
- Practical Ethical Hacking (PEH) - TCM Security Academy
- Networking - CISCO Networking Academy

Skills

Tech Skills

- **Security Tools:** Wazuh, TheHive, Burp Suite, Wireshark, Metasploit, Nmap
- **Programming & Scripting:** Python, Java, JavaScript, Bash, PowerShell
- **Infrastructure:** Linux (Ubuntu, Linux), Windows Server, Docker, GNS3, Windows
- **Cybersecurity Domains:** SIEM Operations, Threat Detection, Incident Response, System Hardening, Vulnerability Management, Secure SDLC, Active Directory, Penetration Testing.
- **Containers:** Docker, VirtualBox
- **Soft Skills:** Analytical Thinking, Team Collaboration, Communication, Documentation
