Experience

07/2024 – **Programmer Analyst Trainee**, Cognizant Technology Solutions India Pvt. Ltd., Chennai, India.

01/2025 ○ Role and Responsibilities:

- Performed manual and automation testing using Cypress, including coding, debugging, and resolving test cases.
- Managed project tasks, tracked issues, and customized workflows in JIRA for improved collaboration and efficiency.
- Created and documented test cases, executed test plans, and provided Cypress knowledge transition and presentations to the team. Ensured project deliverables met quality standards within fixed timelines.

○ Tool - Functional and Automation Testing, Agile development, JIRA, Cypress, Tosca, MySQL, QTest, Microsoft Office.

12/2023 – **Programmer Analyst Trainee - Intern**, Cognizant Technology Solutions India Pvt. Ltd., Chennai, India.

06/2024 ○ Role and Responsibilities:

- Led a full-stack development project as part of an SDET internship, guiding the team for seamless execution while building a real-time retail management application using Java.
- Gained hands-on experience in functional testing and automation frameworks like TestNG, Selenium, and Cucumber, and automated a real-time web application while performing regression and smoke testing.

○ Tool - Core Java, Full-Stack Development, MySQL, Selenium

10/2023 – **Software Developer Intern**, Digitus Business Solutions Pvt Ltd, Bangalore, India.

11/2023 ○ Role and Responsibilities:

- Developed the front-end using Vue and Vuetify, implemented user authentication with JWT and Spring Security, and managed local storage with session tokens.
- Built user management modules, managed entities with Spring Boot, and handled various cases of purchase order tracking in the supply chain management system.

○ Tool - Vue.js, Vuetify, Java Core, Spring, and Spring Boot

Education

03/2025– **Master of Science (MSc) Cyber Security**

09/2026 Hochschule der Bayerischen Wirtschaft gGmbH (HDBW), Munich, Germany. (Ongoing, Current Grade: 1.79 / 5.0)

○ **AI Methods:** ML-Based Cyberattack Detection & Classification (Individual Project)

- Engineered and selected features from network traffic data, and applied ML algorithms (Random Forest, MLP) in Python to detect and classify cyberattacks, achieving 92% detection accuracy.
- Documented the end-to-end workflow and visualized key data patterns to extract insights and effectively communicate results.

- **Reference Link:**

- Git Link - [Classifying Cyber Attacks Using ML](#)

○ **Computer Systems and Networks:** Computer Networks Simulation Using GNS3 (Coursework Project)

- Designed a secure business-level hierarchical network model connecting 10–20 devices in a mesh topology using OSPF, VLANs, HSRP, and port security to ensure efficient and protected communication.
- Simulated secure cloud connectivity with Bridge and NAT adapters, and captured/analyzed network traffic using Wireshark to optimize performance and troubleshoot issues.

06/2019– **Bachelor of Engineering (B.Eng.) Computer Science**
04/2023 Anna University, Chennai, India. (Graduate - CGPA: 8.38 / 10.0)

- **Bachelor Thesis:** AI-Enhanced Eye Tracking System for Tetraplegia Patients
 - Developed a deep learning-based system to facilitate communication between tetraplegic patients and caregivers by capturing eye gaze movement.
 - Led the project by collecting datasets, debugging, and optimizing code, with message transmission handled via Twilio services.
- **Paper Publication:**
 1. *AI Enhanced Eye Tracking System For Tetraplegia Patients*
- **Mini Project:** NALA: The Virtual Voice Assistant using Python
 - Developed a voice-controlled system using Python modules such as speech recognition, pyttsx3, webbrowser, and pyautogui for executing commands through voice recognition.
 - Enable easy configuration with voice commands for tasks such as setting alarms, searching the Web, and checking the weather.
- **IBM Project:** Vehicle Performance Analyzer using Machine Learning
 - Developed a vehicle performance analyzer application using front-end technologies and machine learning on the IBM Cloud Platform as part of the IBM Project Paper. And using Random Forest Regressor algorithm to train the model, enabling the application to predict vehicle mileage.
 - Github link : Vehicle Performance Analyzer

06/2017– **Higher Secondary School Certificate Examination**
05/2019 Central Board of Secondary Education, Delhi, India. (Graduate).
04/2007– **Secondary School Examination**
05/2017 Central Board of Secondary Education, Delhi, India. (Graduate).

Personal Projects and Participations

GitHub /Arshathhaq
04/2025 Simulating a virtual network using GNS3 with multi router configuration and following Hierarchical Network Model.
03/2025 Clickjacking - Demonstration : Git Link
01/2025 Port-Scanner using python sockets : Git Link
Participations *Active in MetaCTF and TryHackMe (HMA.1002), Gaining hands-on expertise in cryptography, OSINT, and Cyber Kill Chain techniques.*

Technical Skills and Certifications

Technical Skills

- Programming Languages: Python, Java, JavaScript
- CLI & OS: CMD, PowerShell, Bash, Git-Bash, Windows, Linux
- Software Development & Version Control: Vue.js, MySQL, Spring Boot, Postman, Eclipse, Git
- Networking and Security Tools: Wireshark, Burp Suite, Secure Software Development Lifecycle (SSDLC), Cryptography, Threat Modelling
- Automation Testing Tools: Selenium, Cucumber, Cypress
- Containers: Docker, VirtualBox

Certifications **GitHub:** Arshathhaq/Certificates

- Practical Ethical Hacking (PEH) (In Progress) - TCM Security Academy
- Practical Help Desk - TCM Security Academy
- Networking - CISCO Networking Academy
- Blue Team Junior Analyst - Blue Team Security
