Experience

07/2024 – **Programmer Analyst Trainee**, *Cognizant Technology Solutions India Pvt. Ltd.*, Chennai, India.

01/2025 ○ Role and Responsibilities:

- Executed manual and automated tests using Cypress, completed 150+ test cases in 3 months and **improved** defect detection efficiency by **25%**.
- Developed and integrated automated test suites into **Git-based CI/CD pipelines**, covering **functional testing**, API validation, HTTP request/response checks, and basic **API security** standards.
- Supported secure coding practices and QA processes for enterprise applications and provided internal training on automation and workflow optimization.

○ Tool - Agile development, QTest, JIRA, Cypress, Postman, Git-Lab, Microsoft Office.

12/2023 – **Programmer Analyst Trainee - Intern**, *Cognizant Technology Solutions India Pvt. Ltd.*, Chennai, India.

06/2024 ○ Role and Responsibilities:

- Led a full-stack development project and guiding the team in delivering a real-time retail management application using Java while validating core workflows and API functionalities for secure operation.
- Gained hands-on experience in functional testing and automation using Selenium, and Cucumber; automated end-to-end test suites for a live web application, performing regression/smoke testing and verifying input validation, authentication flows, and basic API security behaviors.

○ Tool - Core Java, Spring Boot, MySQL, Selenium

10/2023 – **Software Developer Intern**, *Digitus Business Solutions Pvt Ltd*, Bangalore, India.

11/2023 ○ Role and Responsibilities:

- Developed a **secure** and responsive front-end using Vue and Vuetify, implementing **JWT-based authentication** with Spring Security and optimizing user and **purchase-order workflows for efficient system performance**.

○ Tool - Vue.js, Vuetify, Java Core, Spring, and Spring Boot, Postman, Eclipse, Git

Education

03/2025– **Master of Science (MSc) Cyber Security**

09/2026 *Hochschule der Bayerischen Wirtschaft gGmbH (HDBW)*, Munich, Germany. (**Ongoing**, Current Grade: 1.79 / 5.0)

○ **AI Methods**: ML-Based Cyberattack Detection & Classification (Individual Project)

- Engineered and optimized features from network traffic data and applied ML models in Python to detect and classify cyberattacks with **92% accuracy**, documenting workflows and visualizing insights for effective result communication.
- **Project Link**: Classifying-CyberAttacks-Using-ML

○ **Computer Systems and Networks**: Computer Networks Simulation Using **GNS3** (Coursework Project)

- Confident in networking concepts including TCP/IP, VLANs, OSPF, NAT/Bridge and port security, with hands-on experience designing, simulating, and troubleshooting secure networks, using tools like **Wireshark** for traffic analysis.

○ **System Analysis and Hardening**: Audited and hardened Linux and Windows systems by **analyzing logs**, **securing authentication**, mitigating vulnerabilities (**Buffer Overflow**, **SSH/RDP hardening**), managing users and enforcing **ACL policies**.

○ **Application Development and Security Lifecycle**: Hands-on experience analyzing OWASP Top 10 vulnerabilities with **Burp Suite**, assessing CVEs (CVSS/CWE), practicing secure coding and deployment.

○ **Cryptography**: Gained hands-on and theoretical knowledge in Cryptography, implementing **symmetric/asymmetric encryption**, **hashing** and secure communication principles.

○ **Requirement Engineering and Threat Modeling**: Simulated, hands-on experience performing case-study based threat modeling using **STRIDE** and **PASTA** with the Microsoft Threat Modeling Tool (**MS TMT**).

○ **Legal Aspects and Data Protection**: Hands-on experience analyzing **GDPR**, **NIS2**, the **EU AI Act** and security standards through case studies to identify legal requirements, data protection needs, and compliance gaps.

06/2019– **Bachelor of Engineering (B.Eng.) Computer Science**
04/2023 Anna University, Chennai, India. (Graduate - CGPA: 8.38 / 10.0)

- **Bachelor Thesis:** AI-Enhanced Eye Tracking System for Tetraplegia Patients (Group Project)
 - Developed and led a deep learning-based eye-gaze communication system for tetraplegic patients using **CNNs** and real-time gaze tracking, enabling message transmission via Twilio through optimized dataset collection and model tuning.
- **Paper Publication:**
 1. *AI Enhanced Eye Tracking System For Tetraplegia Patients*
- **Mini Project:** NALA: The Virtual Voice Assistant using Python
 - Developed a Python-based voice-controlled system using SpeechRecognition, pyttsx3, webbrowser, and pyautogui to execute tasks through intuitive voice commands.
 - Github link : NALA-The-Virtual-Voice-Assistant
- **IBM Project:** Vehicle Performance Analyzer using Machine Learning
 - Developed a vehicle performance analyzer on IBM Cloud using front-end tech and ML (Random Forest Regressor) to predict vehicle mileage.
 - Github link : Vehicle Performance Analyzer

Personal Cybersecurity Projects And Labs

GitHub /Arshathhaq

Blog Arshathhaq97

- 10/2025 **Active Directory Security & Privilege Escalation Training** - Built a secure AD test environment to simulate authentication flaws and privilege escalation scenarios for cybersecurity training. (PEH Cert)
- 09/2025 **SIEM & Incident Response Lab** — Built on Wazuh (monitoring) + TheHive (case management); monitored simulated attacks and generated actionable alerts. - More: Medium Blog
- **Tools & Skills:** Wazuh · TheHive · Docker · SIEM · Security Monitoring · Incident Response · Threat Simulation
- 05/2025 **Active Directory Home Lab** — Deployed an on-prem Active Directory lab with domain controllers, users/groups, and GPOs for hands-on identity and access management practice. (Practical Help Desk Certification - TCM)
- 07/2024 **Vulnerable Machines / Pentest Lab** — Created a pentesting lab with Metasploitable and EternalBlue scenarios for exploit development, vulnerability validation and post-exploitation practice.

Participations Active in MetaCTF and TryHackMe (HMA.1002), Gaining hands-on expertise in cryptography, OSINT, and Cyber Kill Chain techniques.

Certifications

Certifications **GitHub:** Arshathhaq/Certificates

- ISC2 Certified Cybersecurity (CC) 2025 - ISC2
- Practical Ethical Hacking (PEH) - TCM Security Academy
- Networking - CISCO Networking Academy

Skills

Tech Skills

- **Security Tools:** Burp Suite, Wireshark, Metasploit, Nmap
- **Programming & Scripting:** Python, Java, JavaScript, Bash
- **Infrastructure:** Linux (Ubuntu, Kali), Windows Server, Windows
- **Cybersecurity Domains:** SIEM Operations, Threat Modeling, Incident Response, Vulnerability Management, Active Directory, Penetration Testing.
- **Containers:** Docker, VirtualBox
- **Soft Skills:** Analytical Thinking, Team Collaboration, Communication, Documentation
